

Registration Process for SL100

If you register for a course offering a Service Learning option that you would like to complete, you must also register for the SL100 section with the same instructor that is teaching the course offering the Service Learning option. The only exception is GEN400. Service Learning is automatic with GEN400.

Example: You are registered for WS311 with Dr. Ninivaggi and would like to participate in the Service Learning option. You must then also register for the section of SL100 assigned to Dr. Ninivaggi in the same year/term/session.

All SL100 sections require instructor permission before you can register.

1. Go to Registration in Self Service
2. Put the course in your cart
3. Click the Request Permission box
4. Enter in the Comments box either your co-registration in a course offering a Service Learning option in the same year/term/session or your planned project not associated with a course offering
5. Click Send Request
6. You will be notified by GCU e-mail if the instructor grants permission
7. If granted, go back to Self Service and complete the registration process
8. If successful you will see the course on your schedule

Please note: Permission being granted for registration does not register you for the course. You must complete the process.
